'Our Last Chance?'

If you can assume eventual Communist victory over our nation, then I predict that in the last few years of the struggle the Communists will quietly take over our government without the public's knowing it. To them this method will mean less trouble and less cost, and our cities and factories intact will be a bigger prize.

Before infiltrating our government with our own people as their secret agents, they will infiltrate the labor unions, schools, churches, communications, Negro organizations and then the Democrat party.

They will not make nearly the attempt, if any, to infiltrate the Republican party because of its close orientation to all business people, large and small, professional people and generally successful people, the educated and informed, the people who have the most to lose, and the people who are the most aware of the miseries of Communism.

Many Northern Democrats generally are indifferent, weak on abstract thinking and highly susceptible to emotional bait making them easy prey of political opportunists. The Communists, I assume, are enthusiastic about the preying opportunities.

After secretly winning control of our government, which will automatically give them control over all our military services, the FBI, the Secret Service, the General Intelligence Agency, the State Department, etc., they will then meticulously and scientifically attempt to win acceptance of Communist principles, programs and ideology amongst our 190 million people.

In the early stages of this indoctrination, they will not label these principles and programs as Communist but instead as "liberal," "forward-looking," "wave of the future," "progressive."

While this is going on, their puppets in our government will loudly criticize Communism and boldly act patriotic, but when it comes time to act against Communism the puppets will find one excuse after another to do nothing except to send a strongly worded note to the offending country, or occasionally make a token military stand.

With secret internal control of our government, the Communists can easily go about internal conquest of all the free world in a deliberate and well planned manner.

Although I favor a two-party system, the best thing for our nation's future and progress in the true meaning of the word will be a smashing Republican victory in the next election. And let's make the Republican party the majority party at least until the Cold War is won.

This may be our last chance for freedom.
